# Birding for Beginners

**Sundays, 8:00 – 10:00 a.m. Third Sunday of every month: December 21, January 18, February 15, March 15, April 19**

Halibut Point State Park, along the Atlantic migratory path, is an excellent locale for birding with over 100 species spotted last year. Winter waterfowl is spectacular! Meet Peter VanDemark in the parking lot for this approximately 2 mile stroll along graded paths and the rocky coastline. Learn how to identify some common and uncommon shore, migratory and feeder birds by sight and sound. Bring your binoculars! Best for adults. Hike includes some scrambling on oceanside boulders. Please dress very warmly. Halibut Point is *very* windy.  
For more information call 617-828-1728.
